

We have compiled a list of tools including everything you need for installing Drytile tiles. It might look like a lot at first, but most items are already available in practically every household. You can hire a tile cutter from a DIY store.

PREPARATION

- Straight edge or spirit level (min. 2 m in length)
- Filler – mallet (for examining the floor)
- Angle grinder, if necessary, to grind off high spots
- Broom
- Vacuum cleaner

INSTALLATION

- Folding rule or tape measure
- Rubber mallet
- Tile cutter (can be hired from a DIY store)
- Suction lifter
- Angle grinder with a suitable cutting blade for porcelain stoneware tiles
- Cutter knife
- Installation adhesive
- Silicone gun

JOINTING

- Bricklayer's trowel/plastering trowel
- Measuring jug
- (Kitchen) scales
- Bucket
- Cordless screwdriver or drill for mixing the grout
- Mixing paddle for mixing the grout (approx. 80 mm diameter)
- Rubber grouting board for plastic grouting, for example (not foam rubber!)
- Washing set/washing boy for grouting
